

# Intego NetBarrier X9

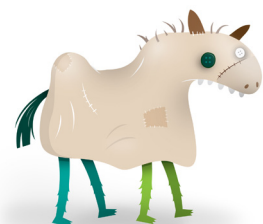

Intelligent two-way firewall for home and hotspot network protection

Intego NetBarrier X9 is a two-way Mac firewall that provides anti-spyware measures to protect outgoing data sent from your Mac. It also actively monitors applications using your network and keeps you informed when a new connection is opened—letting you block or allow attempts to access your Mac. Our two-way Mac firewall provides automatic protection as you move from one location to the next, so whether you're at home, work, or on the go, you'll be safeguarded against strangers and suspicious applications.

## Mac Security is More Important Now Than Ever Before

As more people switch to Macs, hackers and cyber-criminals are seeing a larger market to exploit for malicious purposes. An alarming 80% of residential networks remain unsecure, and many people don't understand the risks of using public Wi-Fi to access their personal accounts or transmit sensitive information. Safeguarding your Mac against strangers and applications trying to access it means you're protecting your privacy and keeping your world secure.

## The Best Approach to Mac Security is a Layered Defense

Connected to the Internet, your Mac is no more immune to intrusion than the next computer. To the bad guys, it's just an IP Address and open ports, and accessing your personal information via these cyber-criminal gateways is easier than you want to know. This is why a layered approach to security is vital to protect your Mac. Intego NetBarrier X9 blocks unsolicited visitors in their tracks, keeping the bad guys out of your Mac.

"The brilliant part of NetBarrier is that it lets you set up different profiles based on the network you're interacting with. What's blocked are external computers trying to access your computer."

— AppleTell

## Intego NetBarrier X9 Product Comparison

Intego  
NetBarrier X9

Intego  
VirusBarrier X9

Intego Mac  
Internet Security X9

- ▶ Anti-Virus
- ▶ Anti-phishing
- ▶ Mac and PC malware protection
- ▶ iOS scans
- ▶ External device scans
- ▶ Two-way Mac Firewall
- ▶ Anti-spyware
- ▶ Application monitoring

### Provides Automatic Protection While You're On the Go

Intego NetBarrier X9 switches to the best level of protection based on where you are. We'll prevent strangers from accessing your Mac's contents that would otherwise be exposed in an unsecure setting.

### Protects Against Unknown Devices Trying to Access Your Mac

Want to share files with your friend at the coffee shop without worrying about strangers nearby? Intego NetBarrier X9 identifies other computers or devices that try to access your Mac and lets you decide what's allowed in and what gets denied.

### Three Simple Settings for Easy-to-Use Functionality

Intego NetBarrier X9 has simplified network settings options to home, public, or work. When we see that your network connection has changed, we let you know and make it easy for you to adjust to the appropriate tier of protection.

### Makes It Easy to Allow Specific Connections

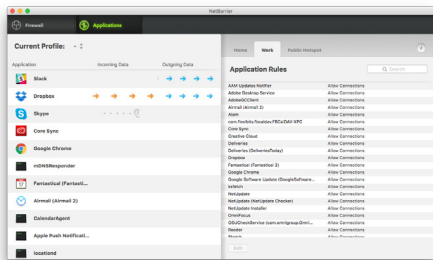

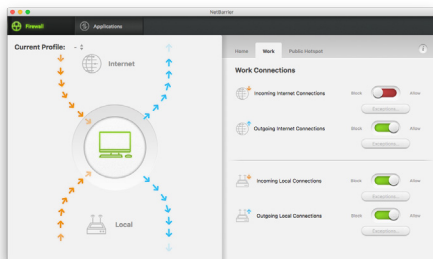

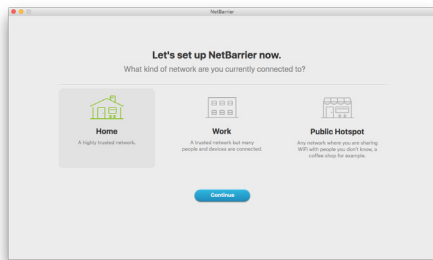

Intego NetBarrier X9 makes changes to your firewall simple and understandable. Temporarily allow connections from the Internet, allow remote desktop and more. You'll learn how to change settings and quickly feel like a networking pro.

### Watches Network Connections

Intego NetBarrier X9 monitors applications using your network. Whenever a connection is opened, we'll run or block it depending on what you specify. Apps using too much bandwidth can be deactivated to improve network performance.

### Easily Blocks Connections to Specific Internet Domains

If you're uneasy about having applications share your personal information or your browsing habits with third parties, Intego NetBarrier X9 lets you easily block apps from communicating with specific Internet domains.

#### System Requirements:

- Mac® computer with Intel® Core 2 Duo processor
- Mac OS X 10.8 or higher
- 1.5 GB of available hard disk space
- Secure Internet (https) connection required for License Authentication, Online Manual, and NetUpdate security updates

#### NetBarrier X9 is available in:

English, French, German, Spanish, Japanese
