

# Intego Content Barrier Secure X9

Parental Controls and Internet security software for Mac

Intego ContentBarrier Secure X9 is our parental controls and Mac Internet security solution that allows you to create appropriate online boundaries for any child from toddler to teen. It also contains two of our best-selling products, VirusBarrier and NetBarrier, that protect your Mac against malware, adware and network attacks.

## ContentBarrier Provides Both Freedom and Safety

Intego ContentBarrier X9 acts as your children's digital guardian whenever they go online. It's easy to set up customizable profiles that monitor Internet habits and restrict adult content. Your kids are given a world that's safe and age-appropriate, and you're given peace of mind knowing that they're protected from hidden online dangers.

## Intego VirusBarrier X9 Protects You from Malware Threats

Intego VirusBarrier X9 provides real-time protection against the growing number of sophisticated malware, adware and other security threats targeting Macs, and automatically scans files whenever they're accessed to keep your Mac free of malware. It detects all types of known Mac malware, including viruses, Trojan horses, worms, and more.

## Intego NetBarrier X9 Safeguards Your Mac from Network Attacks

Intego NetBarrier X9 is a two-way Mac firewall that provides anti-spyware measures to protect outgoing data sent from your Mac. It also actively monitors applications using your network and keeps you informed when a new connection is opened—letting you block or allow attempts to access your Mac. Our two-way Mac firewall provides automatic protection as you move from one location to the next, so whether you're at home, work, or on the go, you'll be safeguarded against strangers and suspicious applications.

"If you're in the market for a fast-working antivirus program, VirusBarrier ... is the gold standard. It will protect your Mac without making your other work grind to a halt."

— Macworld

"This program proves to be a reliable solution when it comes to preventing your kids from surfing on objectionable websites."

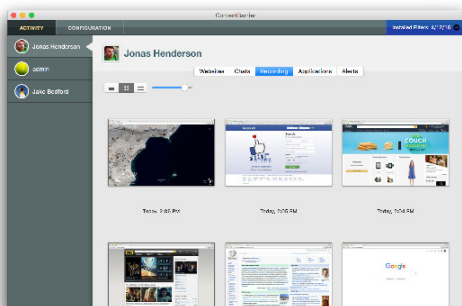

— Mac Informer

"The brilliant part of NetBarrier is that it lets you set up different profiles based on the network you're interacting with. What's blocked are external computers trying to access your computer."

— AppleTell

## What's Included in Intego ContentBarrier Secure X9?

- ▶ **ContentBarrier X9:** Parental Controls for Mac to keep your family's digital world safe, secure, and appropriate
- ▶ **VirusBarrier X9:** Award-winning Mac anti-virus software fights Mac and Windows malware that threaten your security
- ▶ **NetBarrier X9:** Intelligent two-way firewall for home and hotspot network protection

### Provides a Safe Surfing Environment for Family Members

Use Intego ContentBarrier X9 to block out objectionable categories of Internet sites. You can also set up a specific list of websites that get parental approval so your kids can access them without accidentally running into a filter.

### Creates Different Setting Configurations Per Account

Assign different profiles for your teenage son and your younger daughter and configure each one differently. That way your son can get online to do homework while your five-year old can print a coloring sheet.

### Automatic Scans and Around-the-Clock Protection

Intego VirusBarrier X9 scans files whenever they're accessed and automatically checks for the latest updates to make sure you're protected against the newest Mac threats as well as any Windows threats.

### Protects Against Both Mac and PC Malware

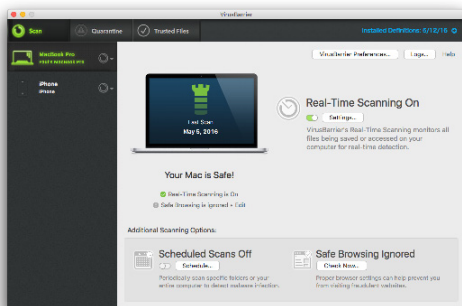

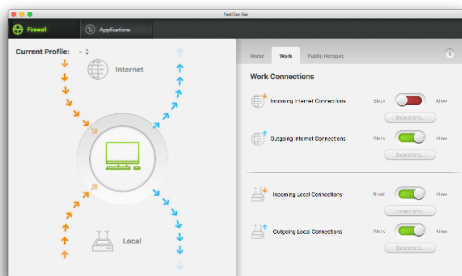

Intego VirusBarrier X9 not only protects you from existing Mac threats, it detects all known PC-based malware so you don't spread infected files to friends, family, or work colleagues.

### Provides Automatic Protection While You're On the Go

Use Intego NetBarrier X9 to switch to the best level of protection no matter where you are. We'll prevent strangers from accessing your Mac's contents that would otherwise be exposed in an unsecure setting.

### Watches Network Connections

Intego NetBarrier X9 monitors applications using your network. Whenever a connection's opened, we'll run or block it depending on what you specify. Apps using too much bandwidth can be deactivated to improve network performance.

#### System Requirements:

- Mac® computer with Intel® Core 2 Duo processor
- Mac OS X 10.8 or higher
- 1.5 GB of available hard disk space
- Secure Internet (https) connection required for License Authentication, Online Manual, and NetUpdate security updates
